

Run the world's greatest route and raise funds for the Dyspraxia Foundation!

The British 10k London Run

Sunday 9 July 2017

Dyspraxia is surprisingly common in both children and adults. It is a hidden condition which is still poorly understood. Frequently falling over, difficulty walking up and down stairs, poor at dressing, no spatial awareness, inability to remember more than two or three instructions at once, barely legible handwriting, problems forming relationships and prone to bullying – these can be familiar symptoms for children with dyspraxia.
